REMARKS

Applicants hereby submit that the enclosures fulfill the requirements under 37 C.F.R. §1.821-1.825. The amendments in the specification merely insert sequence identifiers and replace the paper copy of the Sequence Listing with an amended Sequence Listing containing the nucleic acid sequences at page 20, Table 1, of the specification. I hereby state, as required by 37 C.F.R. §1.821(g), that the enclosed submission includes no new matter.

Attached hereto is a marked-up version of the changes made to the specification by the current amendment.

Please apply any charges or credits to Deposit Account No. 06-1050.

Respectfully submitted,

Date:

July 23, 2001

In the specification:

Paragraph beginning at page 17, line 5, has been amended as follows:

Fig. 3 compares the amino acid sequence of human OCTN1 (SEQ ID NO:1) with that of human OCTN2 (SEQ ID NO:3). Amino acid residues conserved in both transporters are shaded. Sequences coinciding with the consensus sequences of sugar transporter and the ATP/GTP binding site are indicated by "+" and "*", respectively.
